ABOUT ME

Second-year BTech Computer Science undergraduate with a developing interest and a foundational understanding of programming and core computer science subjects. Has worked on academic and practice-based projects involving Python, Java, database systems, and basic backend development through coursework and hands-on learning. Possesses good communication, teamwork, and problem-solving skills, and is committed to continuous learning.

EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY, CHENNAI, TAMIL NADU

2024–2028

BTech – Computer Science and Technology (Pursuing)

MAHESHWARI GIRLS PUBLIC SCHOOL, JAIPUR, RAJASTHAN

2011–2023

Secondary (Class X) and Higher Secondary Education (Class XII)

SKILLS

- Programming Languages: Python, Java, C, C++
- Backend & Tools: Flask, FFmpeg, SQL, Git, GitHub, VS Code, IntelliJ
- Web Technologies: HTML, CSS, React
- Core CS Subjects: Object-Oriented Programming(OOP), Data Structure & Algorithms(DSA), Computer Architecture and Organisation(COA), Operating Systems, Design and Analysis of Algorithms(DAA), Database and Management System(DBMS)
- Soft Skills: Communication, Teamwork, Time Management, Adaptability

PROJECTS

EchoMind – Multi-Agent Audio AI

In Progress

Gemini API, React, Twilio, tRPC, Web Audio API, XAI Risk Engine

- Building a real-time audio threat detection system using a multi-agent pipeline (Perception → Decision → Action) to identify critical events like screams, alarms, and gunshots.
- Integrating Google Gemini LLM for decision reasoning with an XAI Risk Engine for explainable threat scoring, and Twilio SMS for automated real-time alerts.
- Frontend built with React featuring live audio visualization and a real-time monitoring dashboard.

VidSnapAI – AI Powered TikTok/Reel Generator

Python, Flask, AI APIs, FFmpeg

- Developed a Python-based application for automated short-form video generation
- Implemented backend logic for file handling and processing using Flask
- Integrated AI-based text-to-speech for audio generation
- Used FFmpeg to combine visuals and audio into final video outputs

Campus Marketplace Application (Academic Project)

- A student marketplace platform designed to enable easy buying, selling, and exchanging of items on campus.
- Built and managed user registration and login pages as part of the project.
- Collaborated with teammates, gaining hands-on experience in teamwork and project workflow.

WORK EXPERIENCE

Cyber Security Intern – InternsElite

June 2025 – August 2025

Virtual Internship

- Completed an introductory internship focused on basic cybersecurity concepts
- Learned about common security threats, vulnerabilities, and safe computing practices
- Performed basic tasks related to understanding network security and system protection
- Gained awareness of security fundamentals and industry terminology

Data Analytics Job Simulation – Deloitte (Virtual Experience)

December 2025

Virtual Experience Program

- Completed a virtual job simulation involving data analysis and business problem interpretation

COURSES & CERTIFICATES

- NPTEL – Programming in Java: 98% (Top 1%)
- NPTEL – Fundamentals of Object-Oriented Design and Programming (OODP): 82%
- NPTEL – Operating Systems
- NPTEL – Design and Analysis Of Algorithms (DAA)
- NPTEL – Database and Management Systems (DBMS)
- Python Bootcamp: Learn Python from Scratch
- Oracle Cloud Infrastructure (OCI) Data Science Professional (Pursuing)
- HackerRank Badges – C++ (3 Stars) | Java (3 Stars) | Python (3 Stars)
